Seoul Upcycling Plaza aims to expand environmental, social and economic awareness around upcycling based on the “Resource Circulation Seoul City Vision 2030” and foster the ecosystem of upcycling-based industries.

The plaza invites citizens to participate in a valuable and healthy circulation of production, distribution and consumption which they experience in everyday life. It also helps citizens create a new lifestyle through various educational programs (workshops, performances, exhibitions, etc.).

Special Features

- Information, education and experiential activities on upcycling
- The world's largest complex upcycling cultural space (opened on September 5, 2017)
- Experiences about every stage of upcycling: information sharing, resource processing, product creation and sale
- Educational programs and exhibitions to experience upcycling culture in an easy and fun way
- An eco-friendly resource circulation center aimed at spreading the upcycling lifestyle

Major Events

- Seoul Metro workshop
- Design Center Busan workshop
- Seoul Civil Servants Union workshop
- Local Finance Association workshop
